2.2.1 The institution assesses the learning levels of the students and organizes special Programmes to cater to differential learning needs of the student (QLM)	Weightage 15

Through a policy, MLRIT tries to help advanced learners to be excellent and slow learners to be better performers. Within the classroom there are different learning levels of students; some are very intelligent in learning and some are quite weak. Hence, it is essential to find out the abilities of the students in the classes. Based on the ability find out, a few students need only assistance and remaining students need a hard work and habitual thought.
